

Adjustable feet

Remember putting coasters under table legs on patios to ensure the table doesn't rock while you're trying to eat? Most floors are not truly flat so the adjustable legs ensure you have the ability to make your chest freezer stable and secure.

Garage Ready

Temperature fluctuation in any environment is no longer an issue as this freezer operates perfectly under variable conditions: Temperatures as low as 0°F, and high as to 110°F, making it the ideal choice to be kept in basement and garage.

Manual Defrost

Manual Defrost system works as a true deep freeze, retaining moisture in the air. With some frost-free technologies, it pulls moisture from the air, also pulling moisture from your frozen products and causing freezer burn. Prevent freezer burn. Occasional defrosting will be necessary to maintain food quality through the included drain hole.

The chest freezer retains 0 degree inside for up to 135 hours after powering off. Power outages don't have to mean automatic waste.

With a line up of sizes to meet any space or storage needs, Hisense chest freezers offer excellent storage for every frozen treat you can think of. Hisense chest freezers provide reliable frozen storage for families of any size! They feature a convenient centre-located recessed handle, and a quiet motor. The indicator light reassures you that power is supplied to the freezer.
