Hisense 36-in 22.6 Cu.Ft Stainless Steel Counter-Depth French 4-Door Refrigerator with Water Dispenser, Dual Ice Maker, and Wi-Fi Connectivity

RQ23G4FSEI

Hisense's new 36-in 22.6 cu. ft. French 4-door refrigerators offer ample space for all your weekly groceries. Premium flat doors with recessed handles result in a sleek design and modern look. The efficient inverter compressor ensures consistent, quieter, and energy-saving cooling. The fridge also delivers fresh filtered water without opening the door and dual ice makers in the freezer make cubed and nugget ice simultaneously. Get flexibility of switching between fridge and freezer with the My Fresh Choice compartment.

Filtered Fresh Water Dispenser

The automatic through-the-door water dispenser offers a convenient way to enjoy fresh, filtered water without opening the fridge door.

Dual Ice Maker

Enjoy the convenience of a dedicated compartment that produces two types of ice — cubed and nugget — simultaneously. With plenty of ice always available, everyone in the family can enjoy their favourite beverage, perfectly suited for any taste or occasion.

My Fresh Choice (Convertible Compartment)

Switch from fridge to freezer (-20°C to $+5^{\circ}\text{C}$) with My Fresh Choice. Ideal for extra groceries or seasonal items. Lower-right compartment.

Wi-Fi Enabled with ConnectLife App (Smart Control)

Use the ConnectLife App to control your fridge—adjust temp, manage food, lock settings, or start Super Cool/Freeze—all from your phone.

Inverter Technology

Enjoy quieter performance, longer-lasting freshness, and lower energy bills thanks to the advanced inverter motor technology, designed to automatically adjust cooling for consistent temperature and extended appliance life.

ENERGY STAR Certified

With our ENERGY STAR Certificate, experience year-round energy efficiency, cost savings, and environmental impact reduction, contributing to a greener planet.

Metal Tech Cooling

The back wall of the fridge is overlaid with stainless steel, ensuring even distribution of cool air from the inside out. This combination of advanced technologies maintains ideal temperature levels while preventing cool air loss and frost build-up.

Triple Temperature Zone

Flexible temperature zones let you store different foods at ideal conditions, reduce odour transfer, and keep everything organized — for greater convenience and control every day

Premium Flat Door Design

PureFlat doors provide a premium look and a counter-depth design fits beautifully in any kitchen.

Cool Fresh Box

The Cool Fresh Box in the lower part of the fridge stays at a steady $0-3^{\circ}\text{C}$, creating a separate zone that keeps meat, veggies, or drinks fresher for longer — regardless of the fridge's main temperature.
